

Day One – Chocolate Slider Gift Package

1. Cut a piece of Designer Series Paper (DSP) to 16.5cmX15.5cm
2. Score at 1.5cm, 7cm, 8.5cm, 14cm. Turn DSP 90 degrees and score at 1.5cm. The edge closest to the 1.5cm score line becomes the bottom of the gift package.
3. Cut out the bottom right corner of the DSP along the score lines (1.5cm square)
4. Cut from the bottom edge up to the 1.5cm score line along each of the score lines that meet it.
5. Fold along all score lines.
6. Add Sticky Strip adhesive to the back of each of the small tabs (the side of the DSP that is facing DOWN) and to the top (side facing UP) of the larger tab that is closest to the RIGHT of the package. Remove the Sticky Strip backing from the two smaller tabs. Fold these tabs in and adhere to the larger tab that does NOT have Sticky Strip on it. Now remove the backing from the Sticky Strip on the remaining larger tab. Fold it over and adhere to the base of the gift package.
7. Add Sticky Strip to the entire length of one of the long side tabs. Remove backing, fold up and adhere to the other side tab.
8. Pinch the tops of the gift package together and punch with the Horizontal Slot punch, creating a slot in both sides of the gift package.
9. Cut a 40cm length of ribbon.
10. Thread the ribbon through the slots from one side of the gift package to the other and pull through so that the gift package is at the centre of the ribbon. Poke your Aero Bar Chocolate down into the gift package, over the ribbon. Tie a knot or bow at the top of the ribbon and trim the ends.
11. Embellish the outside of the Chocolate Slider as desired.
